

Chemical Manufacturer

SAP Business One Gives Control on Organization Work Flow & Actual Costing at various stages

Client Testimonial

“Ours was a very typical implementation in a chemical manufacturing & trading company, which VCERP has carried out successfully by implementing SAP B1 as per our requirement & wishes. We needed a solution that would integrate modules with one another with a couple of features which could not be compromised. We are glad that we chose SAP B1 as the solution and our choice of implementation partner was not short sighted as VCERP has carried it out in style. Most of our typical requirement are met; however, at places we have molded ourselves as per the best industry practices as well. We have full confidence in the skill & support of VCERP team and we wish them good luck for future prospects...”

- Director

Quick Facts

Company

- Location: Gujarat, India
- Industry: Lab Grade Chemical Manufacturer
- Products and Services: High Purity Laboratory Reagents Bulk & Pharmacopoeia Grade Chemicals
- Employees: 45

Benefits

- Better visibility & control over material management
- Systemization of business processes through integrated software
